# Tristan L. Lint

2448 Collins Rd, Corning, NY 14830 |607-438-9651 | tlint3@gatech.edu | U.S. Citizen

## Objective

Seeking a Summer 2026 internship in embedded systems, circuits, or instrumentation. I am a fast learner with hands-on experience in CAD design and rapid prototyping. Eager to contribute to experimental diagnostics or embedded firmware teams.

## Education

**Georgia Institute of Technology | Atlanta, GA** *January 2025 – Present*
Bachelor of Science in Electrical Engineering, GPA 3.5 Expected Graduation, May 2029

## Skills

**Programming:** Python, MATLAB
**Engineering & CAD:** Autodesk Inventor, Onshape, 3D printing, Soldering, Raspberry Pi, Arduino
**Software**: Adobe Premiere Pro, Microsoft Office

## Experience

**Corning Incorporated through Magnit | Corning, NY** *July – Aug. 2024*
***Student Technician II Engineering Intern***
- Converted high-speed camera footage and tracked spray distribution, visualizing hotspots across nozzle pressures and settings
- Assembled and operated custom laser imaging system, aligning lenses and optics for Schlieren imaging

**Jabil Healthcare | Elmira, NY** *July 2023*
***Engineering Exploration Program Intern***
- Designed mock custom bolt project using CAD and presented manufacturing proposal to plant manager and engineering staff
- Analyzed automated manufacturing processes and quality control procedures, mapped a 5-station automated cell

## Projects

**VIP: Mechatronics and Motivation | Vertically Integrated Project, *Undergraduate Researcher*** *Jan. 2026 - present*
- Designed a rigid-flex PCB in Altium to condense a wearable haptic device into a compact ring form factor

**RoboJackets BattleBots | Student Organization: RoboJackets BattleBots, *Team Member*** *Sep. 2025 - present*
- Designed 3lb robot weapon in Inventor; wired and soldered internal components, tested and competed at "Jacket Racket"
- Presented design specifications to senior engineering leads, defended design choices, and incorporated technical feedback

**GT IEEE's "Robotech" Hackathon | Event: IEEE's Hackathon, *Participant*** *Jan. 2026*
- Won 1st Place Overall and 1st in Autonomous Track, engineering "Quakey," a vision-based lunar rover within 36 hours
- Designed robotic arm and electrical systems, integrating power, sensors, and motor control for mecanum navigation

**TOM:ATL Make-A-Thon | Event: TOM:ATL Make-A-Thon, *Participant*** *Oct. 2025*
- Collaborated in design of prototype portable wheelchair-mounted desk surface for community member with cerebral palsy

**iRobot Create 3 Programming Project | Course: Intro to Python, *Python Programmer*** *Fall 2025*
- Developed autonomous navigation algorithms, including flood-fill pathfinding for maze-solving, self-parking, and object-following

**FIRST Tech Challenge Robotics | Team: Team TARDIS 5356, *Team TARDIS 5356*, sponsored by Corning Inc.** *Aug. 2021 - June 2025*
- Served as electrical lead, designer, and driver for team ranking 16th of 224 teams at 2024 FIRST World Championship
- Earned INSPIRE Award (1st Place, 2025 New England Premiere); THINK Award (2nd Place, 2024 FIRST World Championship)

## Leadership or Activities

**Rose's Youth Philanthropists | Executive Committee Chair** *Sep. 2021 - June 2025*
- Led committee meetings and evaluated grant applications, awarding $10,000 annually to youth-serving organizations
- Coordinated fundraising events, raising over $1,600 for local non-profit CASA Trinity

**Elmira Youth Court | Head Judge** *Oct. 2020 - May 2025*
- Led peer panels adjudicating juvenile cases, helping reduce youth crime through restorative justice sentencing
