EDUCATION

Bachelor of Science in Electrical Engineering Georgia Institute of Technology, Atlanta, GA Expected May 2029
- Relevant Coursework: Linear Algebra, Physics I, Intro to Computing (Python)

EXPERIENCE

Engineering Intern July 2024 - Aug. 2024
Corning Incorporated (via Magnit), Corning, NY
- Analyzed spray distribution hotspots across nozzle pressures by processing high-speed camera footage into visualizations
- Assembled and aligned custom Schlieren imaging optics system for flow visualization experiments

Engineering Exploration Program Intern July 2023
Jabil Healthcare, Big Flats, NY
- Designed mock custom bolt project using CAD, presented manufacturing proposal to plant manager and engineering staff
- Analyzed automated manufacturing processes and quality control procedures, mapped a 5-station automated manufacturing cell using TIMWOODS lean analysis

PROJECTS

VIP: Mechatronics and Motivation, *Undergraduate Researcher*, Atlanta, GA Jan. 2026 - present
- Designed a rigid-flex PCB in Altium to condense a wearable haptic device into a compact ring form factor

RoboJackets BattleBots, *Team Member*, Atlanta, GA Sep. 2025 - present
- Designed 3lb robot weapon in Inventor; wired and soldered internal components, tested and competed at "Jacket Racket"
- Presented design specifications to senior engineering leads, defended design choices, and incorporated technical feedback

GT IEEE's "Robotech" Hackathon (Autonomous Track), *Participant*, Atlanta, GA Jan. 2026
- Won 1st Place Overall and 1st in Autonomous Track, engineering "Quakey," a vision-based lunar rover within 36 hours
- Designed robotic arm and electrical systems, integrating power, sensors, and motor control for mecanum navigation

TOM:ATL Make-A-Thon, *Participant*, Atlanta, GA Oct. 2025
- Collaborated in design of prototype portable wheelchair-mounted desk surface for community member with cerebral palsy

iRobot Create 3 Programming Project, *Python Programmer*, Atlanta, GA Fall 2025
- Developed autonomous navigation algorithms, including flood-fill pathfinding for maze-solving, self-parking, and object-following behaviors

FIRST Tech Challenge Robotics, *Team* Member, Corning, NY Aug. 2021 - June 2025
- Served as electrical lead, designer, and driver for Team TARDIS 5356, sponsored by Corning Inc.
- Earned INSPIRE Award (1st Place) at 2025 New England Premiere; ranked 16th of 224 teams and earned THINK Award (2nd Place) at 2024 FIRST World Championship

LEADERSHIP

Executive Committee Chair, Rose's Youth Philanthropists, Elmira-Corning, NY Sep. 2021 - June 2025
- Led committee meetings and evaluated grant applications, awarding $10,000 annually to youth-serving organizations
- Coordinated fundraising events, raising over $1,600 for local non-profit CASA Trinity

Head Judge, Elmira Youth Court, Elmira, NY Oct. 2020 - May 2025
- Led peer panels adjudicating juvenile cases, helping reduce youth crime through restorative justice sentencing

SKILLS

- Programming: Python, MATLAB
- Engineering and CAD: Autodesk Inventor, Onshape, Altium, 3D Printing, Laser Cutting, Soldering, Raspberry Pi
- Software: Adobe Premiere Pro, Microsoft Office
